## EXPERIENCE

### Meta

Software Engineer - Applied AI

New York, NY | June 2026 - Present

Software Engineer - Policy Zones

New York, NY | June 2025 - May 2026 | PHP

- Built infrastructure for Policy Zones, privacy infrastructure responsible for **116M unique daily evaluated flows** across Meta products.
- Led large-scale **migration of 10,000+ API calls** from legacy to modern Policy Zones, leveraged AI agents to parallelize and distribute work.

Software Engineer - VR Shell

Seattle, WA | August 2022 - August 2025 | C++, 3D Graphics

- Shipped feature for customers to attach 2D UI elements to anchors in the 3D world → **100k+ MAU.**
- Led initial prototype for panel occlusion detection; an optimized solution for system to detect when panels occlude other panels and adjust positioning → **patent 64/069,433 submitted by Meta for novel work.**

### Driver Technologies

Software Engineer Intern

Providence, RI | January 2021 - December 2021

- **One of first 10 employees for VC-backed startup** building Driver App and DriverCloud, the #1 car dashcam app in the app store; built features for iOS app and backend.

## EDUCATION

**Brown University**

Providence, RI | May 2022

**B.S. Computer Science**, GPA: 4.0

## PROJECTS

**Pulse**

- Crowdsourced real-time map for discovering events in NYC — live on the iOS app store.

## HOBBIES

Ultimate frisbee, padel, reading.
